change your water
change you life

**Ionized water with antioxidants
Come, experience the KYK difference**

It's simple. On the pH scale ranging from 0-14, at pH7 ordinary water contains equal concentrations of H+ and OH- ions. KYK Ionizer, on the other hand, reduces the amount of H+ ions, to give you alkaline micro-cluster water that's nourishing for your body. However, there is more to it than meets the eye – get the clearer picture about what makes alkaline water the best choice at our water seminar. Here, Mr. Kenneth Wong Founder and MD of H2O Life Source reveals the facts and demonstrates the hydrating powers of alkaline water and the antioxidants it generates.

**Alkaline Water Seminar
Register now! 8100 6600**

**25 July & 1 August 2009 (Saturday), 2 - 4 pm,
Sime Darby Enterprise Centre @ Bukit Merah**

Mr. Kenneth Wong

Master of Engineering (Fluid Mechanics)
Bachelor of Engineering (Hons)
National University of Singapore

Founder and MD, H2O Life Source

Since 1991, Mr. Kenneth Wong has accumulated vast experience in the water purification industry through designing and managing key water projects in major hospitals, universities, wafer fabrication plants as well as clinical and research laboratories such as the IVF Center, Clinical Research Lab, Public Health Lab, Pathology Department.

Korea's No.1
