H2OLifeSource
All-in-one Convenience

Innovative Technology

- ✓ 3 kinds of Water: Hot, Cold & Ambient Temperature
- ✓ Choice of Water: Purified or Purified Alkaline -ORP
- ✓ Compact & Light weight
- ✓ UV Sterilization with Sensor
- ✓ Activated Carbon Filter with Anti-Scaling
- ✓ (Optional) Special Filter for Alkalizing & -ORP
- ✓ Multi-function Settings on Digital LCD
- ✓ Energy Saving Setting
- ✓ Hot Water Safety Lock

Specifications

- Twin filter capacity – 6 months or 1,500 litres
- UV lamp life span: 12 months (approx. 9000 hours)
- Special filter maintains pH 7.5 to pH 9.0 and ORP -50mV to -200mV
- Cold water output: 2-12 °C (approx. 5 litres)
- Hot water output: 90-100 °C (approx. 10 litres)
- Dimension: 30(W) x 35(D) x 33(H) cm
- Weight: 15 kg

ALKALINE HOT & COLD WATER DISPENSER

HOT

AMBIENT

COLD

3 kinds of Water
Hot, Cold & Ambient Temperature

ADJUSTABLE HOT & COLD TEMPERATURES

Having access to cold water with temperatures as low as 2°C and hot water as high as 100°C is not enough. Adjust temperatures to your preference and have your water just right for you.

Hot water output: 92-100°C (approx. 10 liters)

Cold water output: 2-12°C (approx. 5 liters)

COMPACT AND LIGHT  15kg

At a Net Weight of **15kg** and dimensions of **30(Width) x 35(Depth) x 33(Height)cm**, the H2O Renaissance is the lightest and most compact Hot & Cold alkaline water dispenser on the market.

PURIFIED ALKALINE ANTIOXIDANT WATER

Active Hydrogen Negative ORP
-50mv to -200mv

The alkaline and antioxidant filter in the H2O Renaissance is a special feature that makes it stand out from other Hot & Cold water dispensers.

Active hydrogen produced by the alkaline minerals in the alkaline and antioxidant filter neutralises free radicals in the body and maintains the alkalinity of the water at **pH 7.5 to pH 9** and a negative ORP of **-50mv to -200mv**.

SAFETY FEATURES

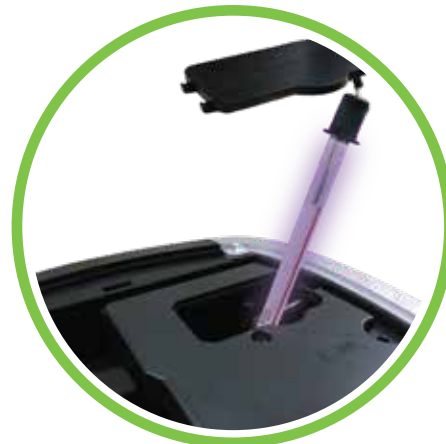

The safety lock feature on the H2O Renaissance prevents accidental scalding, giving you peace of mind.

The H2O Renaissance has attained the Singapore Safety Mark, the highest safety certification in Singapore.

UV STERILIZATION WITH SENSOR

UV Sterilization with a sensor ensures that your water will always be sterilized. Unlike many UV Sterilization technologies on the market, the sensor will alert you if your UV stops working and needs replacement.

VS

900w
800w - Heating
100w - Cooling

ENERGY SAVING

The H2O Renaissance has an energy saving feature that reduces its energy consumption when switched on. However, even while functioning at full capacity, its total energy consumption is only 900W, with no compromise on performance.

Save energy consumption in your kitchen by eliminating the need for multiple appliances.
